

Special Seminar on “Strengthening Research Collaboration between VNU–Hanoi and University of Tsukuba” February 26, 2014 – University of Tsukuba

Organized by: *Sustainability Science, Technology and Policy Program*

Venue: F406 (生物農林学系 F 棟 406)

Time: 9:30 AM – 11:00A M

Abstract

The School of Life and Environmental Sciences has launched the Sustainability Science, Technology, and Policy Program (SUSTEP) to promote research and education collaboration among Asian Universities. The Program has already started student exchange initiatives with Universities from Vietnam, Malaysia, China, Taiwan and Indonesia (through JASSO project). Professor Lien, a leading scientist and vice Dean of Vietnam National University-Hanoi, will visit us to strengthen the collaborative research and networking initiative between University of Tsukuba and VNU-Hanoi. Prof. Lien will give special lectures on the current sustainability efforts carried out in Vietnam. The intended audience is our Japanese and International students from EDL, G30 and SUSTEP Programs.
